## Venture Capital Trusts and Enterprise Investment Schemes

From 6 April 2015 companies benefiting considerably from subsidies for the generation of renewable energy will be excluded from also benefiting from EISs, SEISs and VCTs, as announced previously. Further amendments have been proposed for venture capital schemes. These will include new qualifying criteria in certain cases; in order to limit relief to companies where the first commercial sale took place within the previous 12 years. There will also be a cap on the total investment a company can raise under EISs and VCTs of £15 million, or £20 million for companies that meet certain conditions demonstrating that they are 'knowledge intensive'.
